

Academic Advising Policy

All students are expected to participate in academic advising sessions at GSCC. Before and during registration, students should meet with faculty advisors to learn about college and program requirements, discuss their educational plans, and select courses. Assigned faculty advisors will assist students with creating a plan for program/degree completion.

Students are responsible for speaking with an advisor who will work with them in planning courses for the upcoming semester(s). The advice and recommendation of advisors do not constitute a promise or a contract ensuring a student's graduation on schedule, or the completion of specific requirements.
