

AUT 130 : Fundamentals of Industrial Hydraulics and Pneumatics

This course provides an introduction to hydraulics/pneumatics. Topics include hydraulic pumps, pneumatic compressors work and system components such as valves, filters, regulators, actuators, accumulators, and lubricators. The lab enables students to test, troubleshoot, and repair hydraulic pumps, pneumatic compressors work and system components such as valves, filters, regulators, actuators, accumulators, and lubricators. Upon completion, students will be able to apply principles of hydraulic/pneumatics. Also taught as INT 118.

Program

Automotive Manufacturing Technology

Hours 3

Lab Hours 3

Theory Hours 2
