

# CET 105 : Introduction to Microstation

This course teaches the basic techniques and concepts used in setting up a computer-aided drafting software program on a personal computer to make technical drawings. Students use Microstation in application of drawing/design techniques. Students will be expected to draw proper basic, multi-view drawings using Microstation by the completion of the course.

**Program**

Civil Engineering

**Hours** 3

**Lab Hours** 2

**Theory Hours** 2
