

DMS 229: Sonography Preceptorship I

This course provides the sonography student with the opportunity to practice patient care skills and use beginning sonographic skills in a clinical environment. At course completion, the student should be able to provide basic patient care needs for the individual scheduled for a sonogram and create sonographic images pertinent to the current level of didactic training in general and/or cardiovascular sonography specialties. Competencies will be required. This is a CORE course.

Credits: 2

Program: Diagnostic Medical Sonography
