

MDT 105: Introduction to Computer-Aided Design (CAD)

This course teaches the basic techniques and concepts used in setting up a computer-aided software program on a personal computer to make technical drawings. Students use AutoCAD in application of drawing / design techniques. Students will be expected to draw proper basic multi-view drawings using AutoCAD by the completion of the course.

Credits: 3

Lab Hours: 2

Theory Hours: 2

Program: Mechanical Design Technology
